Personal Kabbalah Life Analysis

for John (Peter) Doe 4.9.1964

From this analysis, you can gather your learning and life tasks which your soul has chosen for this life. The two pictures, the Energy Picture on the left and the tree of life below are of great importance for you and they have been personally worked out for you.

The Energy Picture

shows you which exceptional qualities of spiritual energies have an effect upon you in your life. Through these energies, you are enabled to master the tasks in your life that are connected with them. It is your free will to accept this and to put it into effect. The Energy Picture also shows you the disturbances that can happen in body areas, in which the energy isn't realized. By means of these physical disturbances, your soul wants to point out to you that you are doing something wrong. You will discern your faults from the Energy Picture.

The Tree of Life

has been the traditional central picture of Kabbala for thousands of years. It is the portrayal of the powers in the universe and their interaction. The symbolically portrayed powers show the current condition of your being, energy forms and intelligence forms. A new lively consciousness arises from the interaction of these conditions or brainpowers. These awareness energies have an effect upon the entire universe and therefore also upon the entire human being, upon you personally and upon your soul. You can gather further information about your soul and its aims from your Tree of Life, in which your personal ways are marked. It becomes the reason for your incarnation, the tool, with which you want to work and with which the aim of your life will be worked out and interpreted.
